Norwalk, Connecticut

Dear Charlie,

Reference is made to your request for reports and data relative to the subject, "Reliability and the Miniteman Program", dated 18 January 1960.

DK
The Air Force Ballistic Missile Division is unable to honor such request. The material requested is of too broad a nature. Request you resubmit your request to this office with more specific information as to exact title, date, etc.

The original request by your [redacted] was based on an article in the 19 October 1959 issue of Aviation Week entitled, "Reliability is Essential Miniteman Goal." It is doubtful that such a broad subject could be covered in one technical report. If you can be more specific, we will be happy to try again.

25X1A

Regards,

25X1A
